Project Topic: Crime Management System

Basic steps involved in a Crime Management System

1) **User Interface: user-friendly interface**
2) **Login And Registration**
3) **User choose Options:**
   i) **Online Complaint**
   ii) **Missing Complaint**
   iii) **Criminal Report**
   iv) **Find Police Station**
4) **Online Complaint:**
   o **Enter Complain Details:** The user provides information about the crime (Example: type, location, date/time, witnesses, evidence)
   o **Submit complaint:** The system processes the complaint and sends a confirmation with tracking information.
5) **Missing Complaint:**
   o **Enter missing Person Details:** The user provides information about the missing person (example: name, age, description, last seen location).
   o **Submit missing person Report:** System processes the report and sends a confirmation with tracking information (if available).
6) **Criminal Report:**
   o **Enter Criminal Info:** User can provide details about suspected criminal
   o **Search Database:** Search existing criminal records(based on access)
   o **Submit Criminal report:** System processes the report and sends a confirmation with tracking information (if applicable).
7) **Find Police station:**
   o **Search by Area or pin code:** Enter Area or pin code to find nearby police stations.
   o **Display List**
   o **Select station**

- **Display station Info**
- **Direct search by station name**
- **Display station info(if station found)**

8) User Authentication

Purpose:

- The main purpose of the Crime Management System is to facilitate communication and information sharing between citizens and law enforcement
- Enhance public safety by offering a readily accessible tool for reporting criminal activity and locating police stations.
- Centralized platform to receive and manage these reports, potentially improving response times and case investigations.
